

About Jura Care Village

The Jura Care Village is a specialized Dementia Care Village that offers permanent & day care for people with Alzheimer's and other forms of Dementia.

Located on a 42 hectare coastal estate just outside George, Western Cape, the Jura Care Village is a model for future Dementia Care standards whereby residents are embraced in a home-like environment.

“The heart & soul of our people.”

Alzheimer's & Dementia Caring Facility

“For those who have forgotten who they are, for those who no longer count time and for those to whom love and care is all that matters, the Jura Care Village offers a natural environment away from noise & air pollution and close to home.”

Marlene van Niekerk | Managing Director

Dementia Care Facility

Jura Care's Care Home offers the following:

- Private and semi-private en suite bedrooms furnished or partly furnished to enable the resident to include some own familiar furniture.
- Home-like setting with a beautifully appointed common area including a living room, dining room, activity room and home-like kitchen.
- Social, recreational and wellness activities designed to enrich the lives of residents with Dementia.
- Sensory Stimulation Room that delivers stimulation to various senses with the use of light effects, colour, sounds, music, scents, kinaesthetic objects, etc.
- Daily personal housekeeping (Cleaning of rooms and laundry services)
- All home cooked meals (3 times daily), snacks, in-between meals and refreshments prepared in a home-like kitchen designed by Dieticians.
- Enclosed sensory garden/courtyard for secure and private outdoor enjoyment that includes an aviary, greenhouse, workshop, tea garden, concert hall and childrens's playground.
- Ample walking paths in & around the village.
- 24 hour CCTV.
- Medical management.
- Transportation for medical, dentist and other appointments.

Gardens

Multi-sensory Gardens using touch, sound, sight, smell & taste

Activities & Outings

Regular stimulation through activities & outings

Training Center

With our training center, our caring standards are constantly improving

The Jura Care Model

The Jura Care Model is one that encourages and facilitates the growth and maintenance of personal independence within the individual, where suitable.

The biggest challenge of Dementia Care in South Africa is that of supervised freedom. At the Jura Care Village, we look at each individual and establish which areas of their life, freedom is desired. We then adapt each individual's care perspective so that we accommodate their independence in a safe manner.

The Jura Care Village has an abundance of facilities & resources to allow each individual their own place of care. A Dementia resident that loves to go for morning walks can enjoy the multiple walking paths of our estate while accompanied. A resident who enjoys & remembers going to the coffee shop for some freshly baked muffins & a cup of coffee or tea will enjoy Jura Care's very own tea garden.

In these & many more ways, the Jura Care Model is not something set in stone. Instead, it is a guideline that adjusts to every resident's needs & desires.
